

VISIONLIGHT IRELAND

Proposal For:

Road Safety & Energy Management Using VisionLight Solutions

WHAT WE OFFER:

We design, produce and supply Photo Luminescence road safety lights/lamps, signs and symbols under our brand called "**VISION LIGHT**" made specifically to:

- Indicate various hazards that are present in road and walking places.
- Warn travellers to always keep watching on those hazards by giving required information and safety instructions.
- Inform the presence and/or likeliness of road hazards and also keep workers' safety awareness.
- Reduce accidents on roads during construction and maintenance work.
- Beautify the road transport environment by making it look elegant and pleasant.

OUR GREAT “VALUE FOR LESS” PROPOSITION:

Our Vision Light Solutions are Road & Street Lamps, Lights, Symbols and Signs are Photoluminescence Products that:

- Do not require electricity except natural light.
- Can Provide illumination 24 hours a day and 7 days a week.
- Maintain significantly higher ratio of visual output over time.
- Provide 16+ hrs of light without re-charging.
- Product Life Span: Over 50 years of life and self-rechargeable.
- Do not require structural work to install.
- Are “cost-free” maintained – do not require maintenance budget.
- Applicable indoor and outdoor in all weather conditions.
- Can be installed in roads: public, cycling; pathways, tunnels, etc.
- Add remarkable value to aesthetic road design and work.

PRODUCT TECHNICAL SPECIFICATIONS (1/2):

- Vision Light can produce and supply standard road safety symbols and signs that consist of messages, words, letters, digits and pictorial symbols with variety of sizes, shapes and colours.
- All the shapes and colours are standardized to make them understandable and overcome language barriers.
- Each shape has different meaning and each colour reflects specific meaning.
- Normally, the shapes of workplace health and safety signs are triangles, circles and squares or rectangles.
- The colours used in workplace safety signs and symbols are red, yellow, blue and green.
- To get the most out of health and safety signs and symbols, you should choose the right one for each road considering the difference type of hazards on “case-by-case” basis.

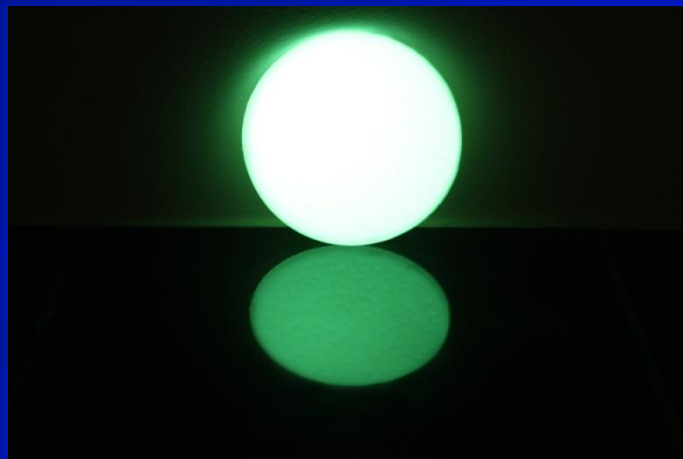

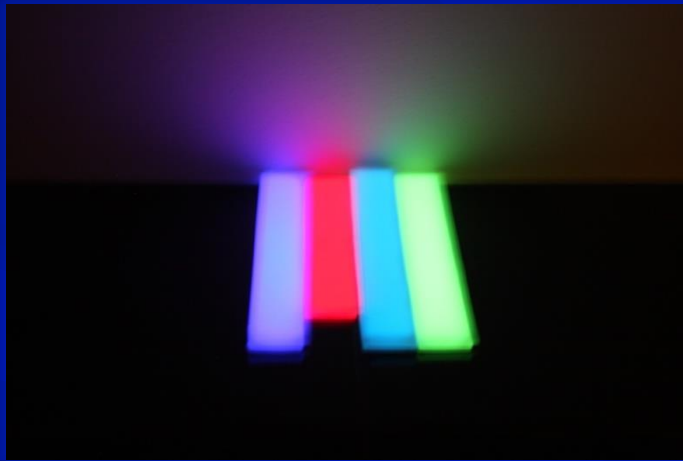

PRODUCT TECHNICAL SPECIFICATIONS (2/2):

- High power light of 331 mcd/m² after 1h.
- After 16h maintains 8 mcd/m².
- Extinction time of 14 days is 89 times better than standard (Referred to as the light decay "period" in DIN 67 510 standard.).
- Unlimited multiple charging with any type of light also with dim light.
- Multiple colours – currently: Yellow, Green, Red and Blue.
- Comfort and durability.
- Easy application to various products.
- No need to power supply or a cable or link.
- Totally harmless.
- No releasing any harmful substances to atmosphere including CO₂.
- Expected applications include a list of over 120 areas of home through safety, rescue, roads to the military.
- The art of beauty design for new road building generation.
